

PETER LAVSKIY

Senior iOS Engineer · Fintech, Banking

Buenos Aires, Argentina · peter.lavskiy@gmail.com · +54 11 2177-5136 · <https://www.linkedin.com/in/peter-lavskiy/> · github.com/Lavskiy
Remote, US Eastern overlap · Contractor (W-8BEN) or EOR, no US sponsorship required

SUMMARY

As a Senior iOS Engineer with over 10 years of commercial experience, I have dedicated my career to building high-quality mobile applications for the fintech and banking industries. My passion for well-crafted software and commitment to delivering reliable products has been evident throughout my work with international teams, from Seamm, a US startup, to Soramitsu, a Japanese fintech company.

TECHNICAL SKILLS

Languages: Swift, Objective-C, Python

iOS & UI: SwiftUI, UIKit, Combine, Swift Concurrency (async/await), Swift 6 strict concurrency (actors, Sendable), Core Data, SwiftData, AVFoundation, Speech, StoreKit 2, App Intents, Push Notifications, SceneKit

Architecture: MVVM, Dependency Injection, modular architecture with Swift Package Manager

AI & Integrations: LLM integration (Haiku 4.5), serverless AI backends (Cloudflare Workers), Core ML, Foundation Models, AI-assisted development (Claude Code), REST APIs

Testing & Tooling: XCTest (unit & UI), Swift Testing, Instruments, Fastlane, TestFlight, Xcode Cloud, GitHub Actions, Firebase, RevenueCat, Stripe SDK

EXPERIENCE

Senior iOS Engineer · Scriptmate (Line Learner) · [App Store](#)

Jan 2026 to Present · Remote

Independent product: line-rehearsal and self-tape iOS app for actors featuring script import, automatic cue detection, teleprompter, and recording.

- Designed, built, and shipped a SwiftUI app (iOS 15+) end to end as a solo developer using Claude Code, reaching 500+ downloads and 12 paid subscriptions within three months of launch.
- Implemented real-time cue detection with word-by-word fuzzy matching on the Speech framework, plus AVFoundation audio routing that plays reader lines through AirPods only to keep recordings clean.
- Built AI-powered PDF script parsing on a serverless backend (Cloudflare Workers with Haiku 4.5).
- Monetized with StoreKit and RevenueCat (free trial, monthly and annual plans) and ran the App Store launch with Apple Search Ads across four markets.

Senior iOS Engineer · Scalable Solutions

Sep 2024 to Present · Remote

Non-custodial crypto wallet for storage and transfer of assets across Bitcoin, Ethereum/EVM chains, Solana, and other networks.

- Profiled the networking layer with Instruments, eliminated 45% of redundant API calls, and added a caching layer, cutting median screen-load time roughly 3x.
- Built CI/CD automation with Fastlane and TestFlight, tripling test-build throughput and accelerating release iteration.
- Introduced initializer-based Dependency Injection across the codebase, making modules independently testable, shrinking PR scope, and speeding up code reviews.
- Automated white-label app builds with a Python pipeline, cutting multi-brand build time 2.5x.

Senior iOS Engineer · Seamm

Feb 2022 to Sep 2024 · Remote

Digital fashion startup creating branded clothing replicas for games, VR/AR, and Web3.

- Built the app for a white-label model and shipped 3 branded apps from a single codebase, each with fully custom design.
- Modularized the codebase with Swift Package Manager, Combine, and DI, enabling targeted, low-risk updates and a weekly release cadence.
- Built an in-app marketplace with Stripe SDK (physical goods) and StoreKit (digital purchases), and rendered 3D branded-clothing models with SceneKit using progressive loading.
- Mentored a junior iOS engineer through code reviews and pairing on DI and SwiftUI, reducing PR rework.

Senior iOS Engineer · Soramitsu

Feb 2021 to Feb 2022 · Remote

Bakong: the National Bank of Cambodia's nationwide mobile banking and payments app.

- Led end-to-end delivery of KYC onboarding (document capture and face verification) using Google ML Kit and AVFoundation.
- Shipped core banking features (fund transfers, bill payments, account management), reducing user-reported issues in these flows by 55%.
- Streamlined the onboarding and compliance flow, increasing completion for new users by 30%.

iOS Engineer · Sberbank

Feb 2016 to Feb 2021

SberBusiness: iOS banking client for legal entities (accounts, payments, documents) at Russia's largest bank.

- Built an in-app banking marketplace with analytics tracking, increasing user engagement by 20%.
- Built a native DI framework and led the Objective-C to Swift migration of the Payment History module.
- Redesigned the Payments section, reducing the module's crash rate by 80%.
- Drove code-review culture and a unified code style as the team tripled in size.

EDUCATION

Far Eastern Federal University · Master's degree, Information Systems and Technologies · 2011
